Pr – Products Table v1.11

August 2018

General changes

Following some work with Northumberland Water Ltd, we have added a number of new pumps for supply water. We have continued working with Transport for London in connection with updating the list of cables for signalling. New codes for products have been added, requested by other users, and a new section for ‘General workshop equipment’ has been added as a result of our work with Transport for New South Wales. Please see the full details below.
