SL – Spaces Locations Table v1.9

August 2018

General changes

Following development work with Transport for New South Wales, we have moved 'Platforms' to the Entities table and added 'Double sided platforms' and 'Single sided platforms' to the Spaces location table. In our work with Transport for London, we are adding Spaces codes for the Docklands Light Railway department. We have also added new codes at the request of other users of the classification. See below for details.
